Trauma Symposium: Orthotics and Prosthetics Management for the Trauma Patient

Continuing Education Contact Hours: 3.5

Patients with traumatic injuries often have different needs, concerns and expectations regarding their injury and recovery. This introductory course will focus on trauma patient care, outcomes, and a range of orthotic and prosthetic interventions, providing you with current and clinically driven care options for your patients.

Leadership within the hospital team may change throughout the course of care, but the goal remains the same: optimal care and successful recovery.

Best Practice Perspectives from:
Trauma Surgeon
Prosthetist
Orthotist
Trauma Patient

Physicians, nurses, social workers, case managers, physical therapists, occupational therapists, and allied health and hospital personnel are all invited to attend this innovative learning opportunity. (see website for CE approval listing)

Featured Speakers

Steve Mandacina, CP | Director of Clinical Support | Hanger Clinic
Bryan Rumsey, CPO | Hanger Clinic
Janae Halter, CO/LO | Rehab Specialist | Innovative Neurotronics
